

ORTON GILLINGHAM TRAINING FOR TEACHERS

JULY 22ND, 23RD & 24TH. 9:00 – 4:00 EAST CENTRAL BOCES – 820 SECOND STREET, LIMON, CO 80828.

For users that have not been trained in this methodology, you should attend all three days in July. For users that have been trained previously, attendance would be on the last day (July 24th). This time is for questions and answers with the trainers, practice, and specific strategies to use with secondary students. The trainings will occur from 9:00 – 4:00 each day.

Often Orton-Gillingham is interpreted as a methodology only meant for reading remediation; however, the multi-sensory component impacts all children. The uniqueness of this type of instruction is that it allows the educator to capitalize on an individual student's dominant learning modality while delivering instruction that will strengthen the remaining learning pathways.

This method will benefit all students Preschool through 12th grade. We are highly recommending that this methodology be utilized for the 2020-2021 school year consistently throughout the BOCES. As such, we will continue to collect and analyze student achievement data to evaluate growth for students in the area of reading.

Please RSVP to loriec@ecboces.org, by Wednesday, July 3rd so we can have a count for supplies and lunch.

- If you are from a school district within the EC BOCES, and are a Title I or Special Education teacher you will receive a stipend of **\$75** per day of attendance during the all-day summer sessions
- If you are from a district outside of the EC BOCES, the cost of this training is **\$250** per person
- You will receive a certificate for continuing education hours
