

McGrath Response System Training

Responding to Title VI, VII & IX Incidents

June 6 - 7, 2022 | 9:00 AM -3:30 PM | East Central BOCES, Limon
(Location to change to Limon High School depending on group size)

The McGrath Response System training provides everything administrators need to confidently take a complaint through its entire lifecycle (inquiry, full investigation, and hearing). The goal of the McGrath Response System training is that participants will receive a visceral as well as an intellectual experience of what the relevant terms and definitions mean to real people. This is accomplished through role play that has the participants experience the impact of sexual harassment and misconduct on the target(s) of those behaviors, on the school climate, and on the trust of the community.

Each participant will receive educational materials on the copyrighted McGrath Response System that will guide the reporting and inquiry process: from the first awareness that something doesn't feel right, to the ability to transmit that information using a simple Incident Report Form that communicates to a trained site person so they may conduct an initial inquiry into the situation and, if there are potential violations of policy and/ or law, the "how to" of conducting a formal investigation in detail.

The McGrath Response System has comprehensive flow charts, sample forms, checklists, and a manual to guide the participants through the processes and serve as a subsequent reference resource. Conducting a thorough investigation and properly documenting findings can help stop the harm and reduce district liability in potential lawsuits.

Details

- June 6 – 7, 2023 | 9:00am – 3:30pm each day
IMPORTANT: *This is a two-day training; you will need to attend both days to receive certification in the McGrath Response System.*
