Bring a device so you can log into School Performance Frameworks and NWEA

9:00 am Welcome and Introduction

9:15 am Data Driven Leadership - Shila Adolf, Educational Consultant

Data-driven leadership uses multiple data sources to guide instruction and improve student achievement. By analyzing assessments alongside classroom and local data, leaders can tailor support, provide interventions, and promote continuous growth. This approach ensures decisions are based on clear evidence to meet the needs of all learners.

In this training, you will learn to:

- Interpret data to identify strengths, gaps, and trends.
- Align data with instructional priorities to drive improvement.
- Create action plans that support teachers, engage families, and impact students.
- Foster a culture of continuous growth.

Together, we'll explore strategies that turn data into actionable steps, empowering leaders to ensure every student achieves a year's growth in a year.

11:30 am Lunch
